The manner in which the application is linked to the current competition.

Compliance with criteria for admission by absolute merit

- a) *I Identify the publication of at least five (5) works within the last five (5) years in the scientific field related to the position for which you are applying, in the form of individually authored or co-authored articles in SCOPUS/Scimago-indexed journals; authored or edited books; individually authored or co-authored book chapters.*
- b) *Identify the participation in at least 2 (two) R&D project with national and/or international funding.*

Curricular Evaluation:

A – Scientific outputs:

i) **Publication in indexed, peer-reviewed scientific journals:**

Whenever possible, provide the DOI, the journal's category in the Journal Citation Report and its quartile in the year of publication, the journal's category in the Scimago Journal Ranking and its quartile in the year of publication, the citations in WoS, Scopus and Google Scholar.

ii) **Other publications:**

Other international and national publications, including books, chapters in books and proceedings of scientific meetings (conferences, events, etc.) and their respective citations in WoS, Scopus and Google Scholar.

iii) **Other scientific production:**

Organization of scientific events and presentations or posters at conferences, as well as awards or other distinctions (international or national).

B – Research Activities:

Wherever possible, indicate the amount of funding for the project, the type of involvement, i.e. coordinator or participant, and the degree of involvement.

- **International:** participation in teams of scientific projects funded or submitted in response to international calls for proposals, specifying whether the funding was public or private;
- **National:** participation in teams of scientific projects funded or submitted to competitive calls for national funding, indicating whether public or private;

C – Management, outreach and dissemination activities:

Participation in scientific and technological outreach initiatives aimed at the scientific community and various audiences, including the delivery of lectures and seminars for strategic audiences and the general public, as well as other means of scientific and technological dissemination.

D – Other information
